Short introduction - Cabin appearance specialist for airlines, MROs and completion

Showroom Hamburg

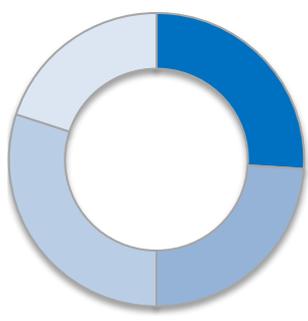

- Flexible niche player
- Technical expertise in field of cabin interiors
- EASA 21J/21G/145
- Based in Hamburg, Germany
- Design, production, repair & testing/certification from one source

Why customers like to work with us...

- Interior parts design, production, qualification & aircraft integration (minor/major changes)
- Specialist in alternate parts as EPA/PMA for customization, cost reduction or out-of-production incl. integration to aircraft
- Material supply from internal stock or production incl. provisioning
- Project management & lead for multi-party projects incl. project specification and communication incl. technical expertise
- Qualified technology portfolio for plastics, metals, soft furnishing production and testing/certification as standard toolbox
- Showroom in Hamburg to define cabin specifics and “feel” parts.

Our fields of expertise

- **Aircraft cabin flooring** (carpet, seat rail covers, raceways, consumables, door mats etc.)
- **Seating** (dress covers, antimacassars, cushions, spare parts)
- **Soft furnishing** (mattress, curtains, bags)
- **Cabin light** (diffusion lenses)
- **Lining** (side wall/ceiling panels, partitions, bins, lateral light covers)
- **OEM Material supply** (seals, lavatory, covers, carpets, yarn, tapes etc.)
- **Services** (testing & certification, stocking, kitting, logistics)

Our business segments:

- **EASYchange®**
Alternate parts design and supply
- **CUSTOMpart**
Part design, production & certification
- **SMARTsource**
Material supply from OEM & market
- **FITrepair**
Cost efficient repairs with certification

Customers and market segments

- Total base of ~280 customers:
- Global airlines & leasing companies
 - Maintenance, Repair & Overhaul (MRO) providers
 - Completion/VIP center
 - Several global sub-suppliers to the airlines as component manufacturers, floor-to-floor provider etc.

A320fam Cockpit Carpet

Alternate material from stock with high cost reduction potential and full certification.

Cockpit Carpet A320fam – Configurations

We have developed a customized and improved cockpit carpet with same form, fit & function with our **EASYchange®** product line.

The cockpit carpet is available in 2 configurations and 4 different raw materials. The configurations are a 3 pieces kit, which is same design as the OEM configuration or the 4 pieces kit.

All material comes with an EASA Form 1 and an EO to install the material. All materials are certified according to EASA.

Introduction

2 configurations

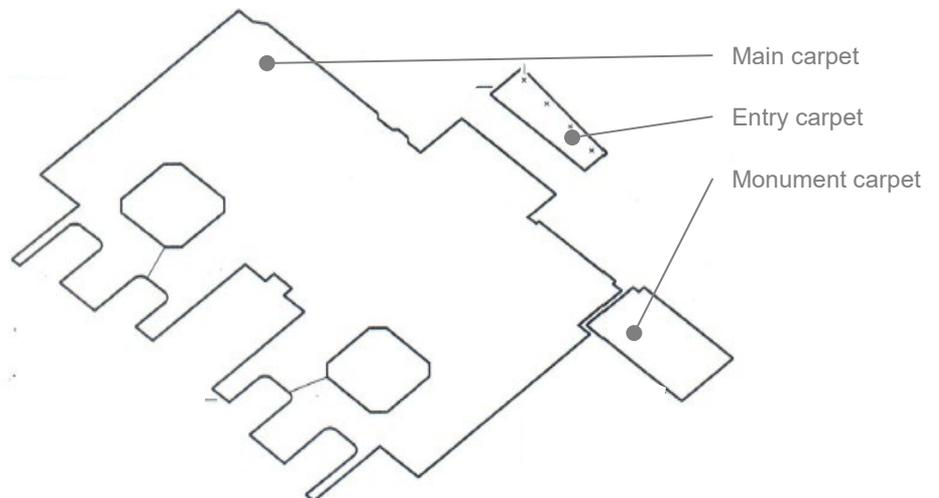

We offer the 3 pieces kit, which is same design as the OEM configuration and the 4 pieces kit. The 4 pieces kit allows to exchange the forward section more often without removing the complete carpet.

Top benefits:

- ✓ 4 pieces design allows to change the main carpet FWD section only
- ✓ Installation of FWD main carpet is less time consuming than 1 main piece
- ✓ Price is 30-40% lower than compared to OEM
- ✓ All material fully certified with EASA Form 1 and EO included (no NRC)

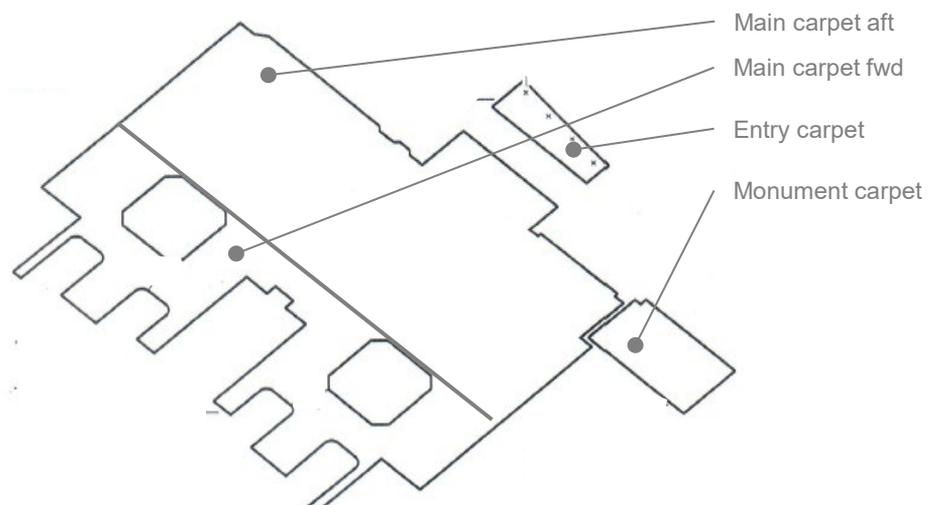

Config A: 3 pieces (OEM concept)

Carpet pieces match with OEM on form, fit & function.

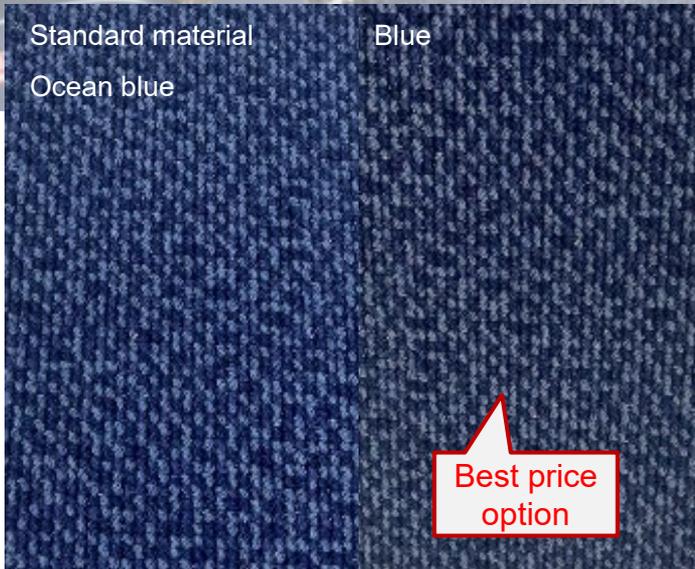

Config B: 4 pieces (improved)

Main carpet is split in FWD and AFT section

Material options

Wool: Standard material Blue
Ocean blue

Nylon: Dark grey Dark blue

Materials

We offer the cockpit carpet in 4 different raw materials. The customer can choose the raw material and configuration.

Wool: 1750g/sqm (t≈5mm)

- Ocean Blue (serging: dark blue)
- Blue (serging: dark blue)

Nylon: 1400g/sqm (t≈4mm)

- Dark grey (serging: black grey)
- Dark blue (serging: dark blue)

All material fulfills FAR 25.853(a) Amdt. 25-83, App. F, Part 1 (a.1.ii), 12 sec. vertical test method and CS 25.853(a), App. F, Part 1 (a.1.ii), 12 sec. vertical test method

Nylon Carpet is made from recycled material (backing 30% recycled; Nylon 100% recycled)

Carpet tape

High quality carpet tape with width of 50mm has a very good application:

- Double-sided
- -40 to +70 degree temperature application
- FAR 25.853 approved
- 25 ME per Roll
- MCoC & burn test report
- Material on stock

Product ID	Description

Certification

The carpets are fully certified. With PO of the parts, we provide you a set of certification documents without any further costs.

Certification

Documents are:

- EASA Form 1 (with parts)
- Engineering Order
- Cockpit Carpet Installation drawing with OEM PN Interchangeability
- Instructions for Continued Airworthiness
- Minor Change Approval (on demand)

Cabin Flooring

Interior Material Support for Cabin Modification & Refurbishment for all Airbus

Flooring components – carpet

We have a Nylon & wool carpet portfolio, please ask for details.

High CO2 reduction potential

Carpet

We stock a dark grey Nylon carpet that is available within 2-3 days.

- Weight is 1200-1300g/sqm
- Color: dark grey
- FAR 25.853
- Fully certified and documentation with material
- Produced from recycled nylon (no fossil resources needed & clean ocean approach)
- MCoC and Burn test report with shipment

Product identification	Description
F12-30621	Carpet, Nylon, dark grey
F12-30622	Carpet, Nylon, dark blue (optional)

Carpet tape

High quality carpet tape with width of 50mm has a very good application:

- Doublesided
- -40 to +70 degree temperature application
- FAR 25.853
- 25 ME per Roll
- MCoC & burn test report

- ✓ Latest technology
- ✓ Fully certified and with EASA Form 1
- ✓ Kitting possible
- ✓ Material from production or stock

Floorpath marking

The PL1100 is one of the latest systems fully applicable for the A320fam evacuation system.

We can supply the total system with all components and can also provide a support on the choice between different generations.

We also supply system **PL22*** and **PL88**. Please send a request to our customer service.

We offer complete aircraft kit packages.

Please ask us for support on different systems as an upgrade to a new generation system holds several advantages.

Flooring components – NTF/carpet threshold profile

- ✓ Fully certified material
- ✓ All colors possible
- ✓ Available from stock on specific colors

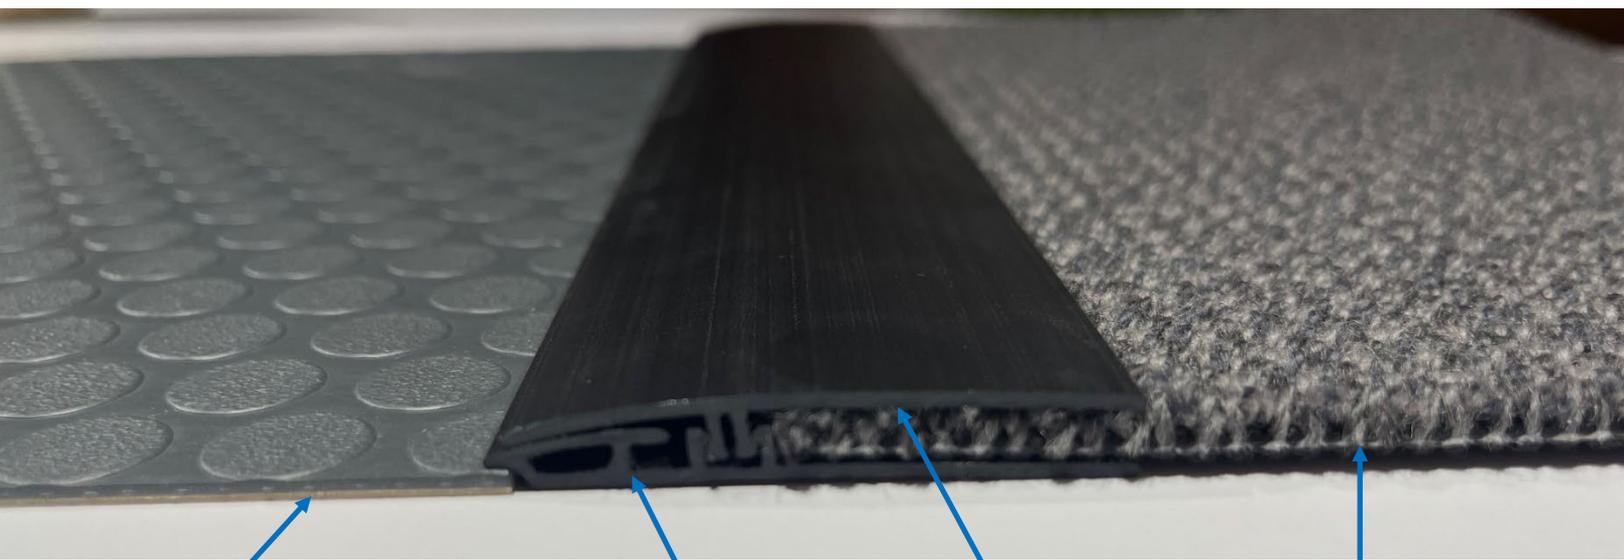

Carpet/NTF

The connection of NTF and carpet needs a specific threshold.

We can offer the threshold profile made in all kind of airbus color codes or customized colors.

All colors possible.

Please ask us if a PN cannot be found. We are happy to check.

interiorDIRECT Capability PN overview

Cabin Flooring Components

Floor Path Marking

Standard	Description
PL22*	PL22 System
PL88*	PL88 System
PL1100*	PL1100 System
PL1600	System w/ black arrows
PL1315	Filler 1,5mm
PL1330	Filler 3,0mm
PL1345	Filler 4,5mm
PL1370	Filler 7,0mm
PL1400	Protector
PL1900	Adapter
PL1901	Adapter

NTF (non-textile flooring)

NTF – raw (not reinforced)

Standard	Description
Batiflex AV135	NTF, raw material
Batiflex AV155	NTF, raw material
Batiflex AV270	NTF, raw material
Batiflex AVF130	NTF, raw material
Batiflex AVM282G	NTF, raw material
Batiflex AVR160	NTF, raw material

NTF (non-textile flooring)

Consumables

Standard	Description
ABS5768	Adhesive film
ABS5093	Moisture barrier

Cabin Flooring Components

NTF/Carpet threshold

Standard	Description
ABS5786	Carpet threshold

NTF (non-textile flooring)

NTF – GFRP material

Standard	Description
ABS5717AA	NTF, GFRP enforced
ABS5718AA	NTF, GFRP enforced
ABS5718AB	NTF, GFRP enforced
ABS5718AC	NTF, GFRP enforced
ABS5718AD	NTF, GFRP enforced
ABS5718AE	NTF, GFRP enforced
ABS5718AF	NTF, GFRP enforced
ABS5718AG	NTF, GFRP enforced
